

Features

- The H2O Degree WM-1200 is a multi-jet water meter for submetering applications.
- The meter is available for either hot or cold versions.
- Pulse Value: 1/10 gal. (standard), 1/1 gal. (specify when ordering.)
- Available sizes include 3/4", 1", 1 1/2" or 2".
- Lead free eco-brass body.
- Installation in horizontal positions while adhering to AWWA C708 accuracies.
- NSF-61-G Certified.
- Meets AWWA C708 Standards.
- Max pressure: 150 psi.
- Temperatures:
 - Cold: 105 degrees F
 - Hot: 194 degrees F
- Flow rates:

GPM	3/4"	1"	1-1/2"	2"	% Error
MIN	0.5	0.75	1.5	2	6
MAX	30	50	100	160	
Continuous	15	25	50	80	1.5
Range	2-30	3-50	5-50	8-160	

- The WM-1200 C/H075 model water meters have a maximum flow rate of 30 gallons per minute with a pressure loss of approximately 13 psi at the maximum stated flow rate. The WM-1200 C/H100 model water meters have a maximum flow rate of 50 gallons per minute with a pressure loss of approximately 13 psi at the stated maximum flow rate. The WM-1200 C/H150 has a maximum flow rate of 100 gallons per minute with a pressure loss of approximately 13 psi at the stated maximum flow rate. The WM1200 C/H200 has a maximum flow rate of 160 gallons per minute with a pressure loss of approximately 13 psi at the stated maximum flow rate. For additional details visit the full specifications at www.h2odegree.com.
- Five year warranty.

Overview

The WM-1200 series hot & cold water meters utilize multi-jet principles for accurate water measurement and are known for their simplicity, longevity and accuracy.

The WM-1200 is tested to the most recent AWWA C708 accuracy standards.

The pulse output capability allows for the meter to be used for remote reading.

The meter is intended for horizontal application only.

In addition to the various sizes, the meter is also available in hot or cold versions.

Technical Specifications

Temperature—Cold—105 degrees F

Temperature—Hot—194 degrees F

Max Pressure—150 psi

Materials—Body-Eco Brass NO LEAD

Materials—Internals-Thermoplastic

Pulse Output—6mA @ 12 VDC

Pulse Value—1/10 gal or 1/1 gal
