

Overview

H2O Degree offers a variety of hose assemblies for Point-Of-Entry (POE) water submetering. This versatile line of products include the PLM10100 flow sensor. The hose assemblies simplify the installation of water submeters, reducing cost and time. In addition, all hose assemblies are factory pressure tested, reducing the potential for leaks.

The hose assemblies can be selected based on the specific plumbing of each project. Other factory assemblies are available (contact factory.)
