

Hose Assemblies—Point of Use

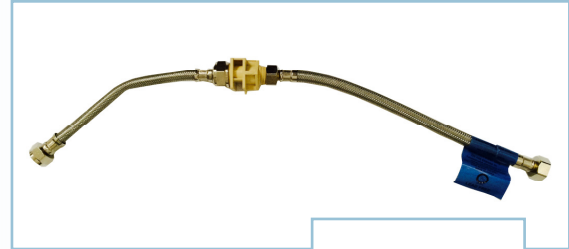

Overview

H2O Degree offers a variety of hose assemblies for Point of Use (POU) water submetering. This versatile line of products include the PLM10100 flow sensor. The hose assemblies simplify the installation of water submeters, reducing cost and time. In addition, all hose assemblies are factory pressure tested, reducing the potential for leaks.

The hose assemblies can be selected based on the specific plumbing of each project and are offered for use on toilets, showers, kitchen sinks, bathroom sinks and washing machines.

Features

- Hose assembly includes the PLM10100 flow sensor.
- Hose assembly available in multiple configurations based on new or existing plumbing.
- NSF 61 & NSF 14 approved plumbing fittings.
- Shark bite quick connectors included where applicable for ease of installation.
- All assemblies factory pressure tested for leak protection.
- Typical applications include:
 - Toilets
 - Showers
 - Kitchen Sinks
 - Bathroom Sinks
 - Washing Machines
- Two year warranty.
