

Schedules

The H2O Degree web portal allows building managers to set schedules to each thermostat on an individual basis or property-wide.

Site Manager

The H2O Degree web portal allows building managers to view temperature graphs for each apartment and measure total heat demand in conjunction with temperature changes.

Custom Tenant Portal

The H2O Degree web portal provides your residents with a personal energy website. This portal provides them with the ability to view and control their thermostats, compare usage to historical data, control thermostat and program settings remotely and helps them to better understand how and when energy is being used.
