# FREE WEBINAR! WATER LEAK & FLOOD DETECTION

Wireless Enabled Water Leak & Flood Detection Solutions for Multi-Family and Commercial Buildings

## Flood Alarm and Shut-Off

Internet enabled leak/flood detection, alarm and remote shut-off wireless systems are the ideal choice for proactively monitoring and eradicating water leaks and flood events from a variety of sources including toilets, washing machines, hot water heaters, showers, and more.

H2O Degree is the leading provider of submetering, utility management, leak and flood detection solutions for multi-tenant residential and commercial facilities.

## Session Overview

- H2O Overview
- Benefits & Applications
- Remote Water Shutoff Valves
- Water Leak Sensor Overview
- Reporting, Alarming
- Q & A

## Wireless Technology

Wireless leak/flood sensors provide users with a cost-effective, easy-to-install solution for all of your water leak and flood detection applications. Integration with remote water shut-off valves prevents catastrophic flood damage.

Whether in new or retrofit properties, wireless flood sensors send alarms to property management personnel and can remotely shut off water valves to prevent damage in areas prone to water leaks and flooding.
